

MicroLatch instruction

1. Locate receiver box (Micro latch normally locates surround driver unit in garage)
2. Locate program button which is next red indicator on the receiver board.
3. Press the program button 1 second, red indicator will be blink
4. Press one button of new remote 1 second, the indicator still blinks. You can continue to program another remote if you have by press button of remote 1 second.
5. Press program button on receiver the indicator will be off.
Now you can test the remote if works.
