

TRG300 remote Instruction

Thank you for purchasing TRG104 from us.

Step A: Open OLD & NEW Operators to find 8 dip switches

Step B: Replicate the original 8 dip switches to the new remote.

ATTENTION: Below is the example. Simply following the Original Operator Settings on your **own original operator settings!** If you **don't have the old operator**, please check the receiver which located on the Power head. Detail location of the receiver on Power head may vary. Other enquires please visit our website: <http://www.mkey.com.au>

If your existing remote is TRG102 (grey with a red round button), for the 8th dip switch, you may need to try both up and down with other seven dip switches same as the old remote.
